

Lulico-AL

(Luliconazole 1% w/w Cream)

Contains:

Luliconazole..... 1% w/w

Cream base..... q.s.

Clinical Pharmacology:

Luliconazole:

Luliconazole is an antifungal medication that treats skin infections. It works by killing the fungi on the skin by destroying their cell membrane. It appears to inhibit ergosterol synthesis by inhibiting the enzyme lanosterol demethylase, resulting in decreased amounts of ergosterol and a corresponding accumulation of lanosterol. This treats your skin infection.

Indications:

Treatment of Fungal skin infections

- Athlete's foot
- Dhobie Itch
- Thrush
- Ringworm
- Dry, flaky skin.

Contraindications: No contraindications as used topically.

Precautions and Warnings:

- Appropriate use: For topical use only; not for oral, ophthalmic, or intravaginal use.
- Unsafe to use during pregnancy and breast feeding.
